**TrotSAR Mounted Team
1218 Sunrise Beach Road
Crownsville, MD 21032**

TrotSAR is a 501 (c)(3) (EIN# 261757738) non-profit, all volunteer, mounted search and rescue squad. The Team's primary purpose is to assist federal, state and local government agencies by providing certified search & rescue responders mounted on horseback, for lifesaving missions of people who are missing, lost, stranded in wilderness, rural, suburban areas or in Wide Area Search missions within the Mid-Atlantic region. TrotSAR is a self-supporting NIMS compliant ESF-9 SAR resource and can supply task writers for all SAR missions

Our Mounted Search & Rescue (MSAR) Teams can deploy in most land terrain within FEMA Region III, from elevations of 5000 feet down to sea level. MSAR can travel on steep grades up to 45 degrees; if a human can walk it, we can ride it and cover the terrain 3 times faster than a person on foot, in an equally efficient manner. MSAR responders can ride through brush, over rocky areas and ford small rivers and large creeks. We provide our own tasks writers, so it is best to request MSAR resources early in the search planning and allow us to help you. The deployment of horses and helicopter shows your community that all available resources are being utilized. All we need is space that equals approximately three school buses for each two person MSAR team

TrotSAR Search & Rescue Mounted Team is on call 24/7 and operates of VHF radio frequency 155-16000. TrotSAR is compliant with ASTM International F-32 F2794 level 1 Mounted SAR Responder Standard .

TrotSAR Mounted Team can be dispatched for deployment via:

**Maryland JOC
410-517-3600**

**Virginia EOC
804-674-2400**

**West Virginia EOC
